HENKEL EXPANDS PRODUCT OFFERING FOR CONCRETE PROTECTION AND REPAIR

Complete Product Line Includes Non-Shrinking, Chemical and
Corrosion Resistant, Fast Cure Formulations

Rocky Hill, Conn. – April 25, 2006... In harsh industrial environments, concrete floors, ramps, stairs, and other concrete structures endure constant abuse. To help maintain safety, Henkel Corporation has expanded its line of Loctite® specialty materials for concrete repair and protection to include fast cure formulations, flexible joint sealants/crack fillers, and chemically resistant materials.

Designed for use on new and existing concrete surfaces, the full line includes products for resurfacing, rebuilding, and repairing concrete surfaces; specialty formulations for concrete subjected to extreme chemical attack from acids, alkalis, and solvents; and urethane and urethane hybrid crack prevention products for expansion or transverse joints.

With cure times ranging from 15 minutes to 24 hours, the families of Loctite® Fixmaster® and Loctite® Nordbak® concrete repair products offer a variety of mix and application temperatures for use in any environment or season. Products are appropriate for vertical, horizontal and overhead surfaces, and are available in a wide variety of compression strengths, chemical resistance properties and end use temperatures. Easy to use complete kit systems are also available.

For more information on the Loctite® line of specialty materials for concrete repair and protection, call 1-800-LOCTITE or visit www.concreterepair.loctite.com. In Canada, call 1-800-263-5043.
