

5810[™] Polyacrylate Sealant

The next generation in liquid formed-in-place gaskets for powertrain sealing

Introducing Loctite[®] 5810[™] Polyacrylate (ACM) Sealant, a formed-in-place liquid gasket developed as a high performance, lowest-cost sealing solution to replace molded rubber gaskets.

Product Benefits:

- High level of resistance to hot engine and gear oils, as well as transmission fluid
- Non-silicone, polyacrylate sealant does not promote foaming of oils
- Significant improvement in permeation resistance versus liquid silicone gaskets

- Long open time for desired manufacturing processes
- Heavy-bodied viscosity allows immediate on-line pressure checks
