HENKEL INTRODUCES LOCTITE® ELECTRIC MOTOR SEMINARS

On-Site Adhesive Seminar Program Trains Motor and Generator Engineers

Rocky Hill, Conn. — September 14, 2006... Henkel Corporation recently introduced a new adhesive training program for manufacturing, product, and design engineers producing today's generators and AC, DC and stepper motors. For this program, engineers and technical representatives from Henkel travel to customer facilities around the world to conduct private on-site educational programs customized to the unique requirements of the motor manufacturer.

Loctite® On-Site Electric Motor Technology Seminars provide in-depth information on available adhesive and sealant technologies and capabilities for motor bonding and assembly. By choosing from a list of more than 10 key topics, participating engineers may customize their seminar to be of direct relevance to their design and manufacturing challenges. Seminar topics include general bonding, magnet bonding, gasketing, potting, retaining, wire tacking, threadlocking and sealing, wire reinforcement, and other topics.

For more information or to schedule a Loctite® On-Site Electric Motor Technology Seminar, visit www.motors.loctite.com.

"Henkel - A Brand like a Friend". Henkel is a leader with brands and technologies that make people's lives easier, better and more beautiful. Henkel, a Fortune Global 500 company, operates in three strategic business areas – Home Care, Personal Care, and Adhesives, Sealants and Surface Treatment. In fiscal 2005 Henkel generated sales of 11.974 billion euros. More than 50,000 employees work for Henkel worldwide. People in approximately 125 countries around the world trust in brands and technologies from Henkel.
