Henkel

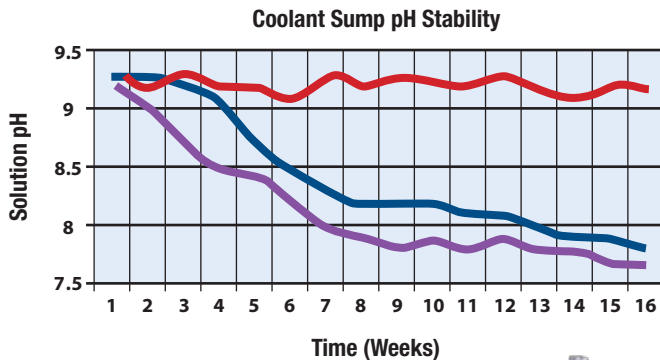

Multan® B-series products are bio-resistant, semi-synthetic metal cutting fluids with extreme pressure and lubricity additives used for light to heavy applications.

Product features:

- Semi-synthetic technology provides excellent lubrication and cooling power
 - Consistent tooling performance
 - Clean running, from the tooling to the finished part
 - Eliminate smut and buildup on the machine interior, tools and the finished part
- Successfully passed independent lab's* biological screening challenge per ASTM WK8252
- Multi-metal applications
- Stable and low foam in all water sources
- Eliminates routine additives and ensures a low maintenance operation
- Creates a predictable, repeatable system
 - Lowest total operating cost option

For a FREE TRIAL to see how the Multan® B-series can have an impact on your operation, call 866-332-7024.

Multan® B-series outperforms the competition.
