PAIL PUMP DISPENSE SYSTEMS FOR ADHESIVES AND LUBRICANTS IN 5 TO 55 GALLON CONTAINERS

Rocky Hill, Conn. — April 22, 2005.... Henkel Corporation has introduced two durable and reliable Loctite® brand Pail Pump Dispensing lines for low viscosity, self leveling fluids and higher viscosity, non-flowable pastes. The fluid pump systems are designed for materials packaged in 5 to 55 gallon containers, and are typically integrated into a complete dispensing system for a single component product or used as a feed system for plural component products.

For self leveling fluids, Loctite® Low Viscosity Fluid Pumps are totally pneumatic and deliver various output volumes determined by the pump ratio (1:1, 3:1, or 14:1) and input pressure. Two distinct pump and seal options are available. The carbon steel pump system with Viton seals dispenses lubricants, epoxies, and urethanes. The inert metal pump system with EPR seals is designed to dispense anaerobics, acrylics, light cure acrylics, epoxy hardeners, and water based products in addition to lubricants, epoxies and urethanes. All Loctite® Low Viscosity Fluid Pumps come with the appropriate tube for either 5 gallon or 55 gallon container dispensing.

The Loctite® High Viscosity Paste Pump Systems are specifically designed for dispensing paste products from 5 gallon pails or 55 gallon drums. These fully assembled systems consist of an air motor, pump tube and pressure ram. Like the low viscosity fluid pumps, these systems offer complete chemical compatibility with all types of adhesives, sealants, and lubricants. Standard systems are available with carbon steel and polyurethane seals. Other wetted and seal component options are also available.

A variety of accessories support the Loctite® Pump Systems including air and product hoses, air and fluid regulators, dispense valves/tips/fittings, pump primers, hose fittings, filters, and other components. These accessories allow Henkel to provide a complete dispensing solution for from package to part. Henkel also offers system integration and assembly services.

For more information on the Loctite® Pail Pump Dispense Systems, call 1-800-LOCTITE (800-562-8483), visit the company's equipment website at www.equipment.loctite.com, or e-mail marketing@loctite.com.

About Henkel:

The Henkel Group operates in three strategic business areas: Home Care; Personal care; and Adhesives, Sealants and Surface Treatments, which serves the transportation, electronics, aerospace, metal, durable goods, consumer goods, maintenance and repair and packaging industries, and offers a broad range of products for the craftsman and consumer. With brands and advanced technologies, Henkel makes people's lives easier, better, and more beautiful. 50,000 employees work for the Henkel Group worldwide. People in 125 countries around the world trust in brands and technologies from Henkel – "A Brand like a Friend".
