

Excellence is our Passion

YOUR SOURCE FOR **BONDING** **PLASTIC BONDING** **STRUCTURAL ADHESIVES**

NEW! Loctite® Bacchus™ 3431™ Adhesive

A hybrid acrylic/urethane adhesive for structural bonding of thermoplastic polyolefins like PP, PE, LDPE, HDPE and similar low-energy surface substrates.

- Achieves high levels of structural adhesive strength and durability on **UNTREATED** substrates.
- No chemical, physical and mechanical surface pretreatment.
- Next generation chemistry.
- Stays on vertical surfaces without migration.
- Also bonds magnesium, aluminum and other metals.
- Manufacturing-friendly 1:1 mix ratio.
- Meets or exceeds OEM specifications.
