Automated System Ensures Easy, Precise Adhesive Placement

New Loctite® Rotary Dispense System Accurately Places Adhesives in Circular or Arc Patterns

Rocky Hill, Conn. — For placing adhesives onto parts in circular or arc-shaped patterns, Henkel Corporation has introduced the Loctite® Rotary Dispense System, a fully-integrated device designed to independently control a syringe or dispense valve without the use of a separate valve controller.

The Loctite® Rotary Dispense System facilitates the repetitive placement of adhesive by synchronizing the operation of the advancing slide, turntable and dispense timer. Set-up of this plug-and-play system is simple, requiring only adjustment of the timer and the motor speed with no complex programming steps.

The system includes reservoir low-level indicators to ensure that adhesive does not run out, precision digital timers accurate to 0.01 second, adjustable height/position/angle of dispense, adjustable speed controls, and manual mode for valve priming.

For more information on the Loctite® Rotary Dispense System, item #1176443, call 1-800-LOCTITE (562-8483) or visit the company's website at www.equipment.loctite.com.

Henkel has been committed to making people's lives easier, better and more beautiful for more than 130 years. A Fortune Global 500 and Germany's most admired company according to a recent Fortune survey, Henkel offers strong brands and technologies in three areas of competence: Home Care, Personal Care and Adhesive Technologies. Each day, more than 52,000 employees in 125 countries are dedicated to fulfilling Henkel's claim "A Brand like a Friend."

In fiscal 2008, Henkel generated sales of 14,131 million euros and adjusted operating profit of 1,460 million euros.
