Brochure Highlights Adhesives and Sealants for Photovoltaic Module Manufacturing

Henkel Literature: *Solutions for the Solar Power Industry*

Rocky Hill, Conn. — A new six-page brochure from Henkel Corporation provides detailed information on the company's line of Loctite® adhesives and sealants for manufacturing photovoltaic and concentrating solar modules. The literature, *Solutions for the Solar Power Industry*, offers technical data on products for elastomeric bonding and sealing, rigid bonding, and potting.

- The seven Loctite® products highlighted in the brochure for elastic bonding provide high resiliency, high elongation, and good adhesion for module-to-frame, module-to-bracket, mirror reflector, and concentrator lens bonding, as well as junction box mounting, and steel bracket-to-mirror panel bonding.
- For rigid metal bonding, the literature offers data on six structural adhesives formulated to provide durable, strong bonds for frame construction and metal bracket assembly.
- For junction box potting, the brochure highlights two-component, non-corrosive silicones that adhere well to plastics, exhibit flame resistance, and provide excellent electrical insulation properties.

For a copy of *Solutions for the Solar Power Industry*, request a copy of brochure number LT-5539 at www.henkelna.com/loctite or call 888-427-3676.

For more than 130 years, Henkel has been a leader with brands and technologies that make people's lives easier, better and more beautiful. Henkel operates in three business areas – Home Care, Personal Care, and Adhesive Technologies – and is ranked among the Fortune Global 500 companies. More than 60 percent of Henkel's sales are in fast-moving consumer goods, while the industrial business accounts for almost 40 percent of the company's total sales. In fiscal 2008, Henkel generated sales of 14,131 million euros and adjusted operating profit of 1,460 million euros. Our more than 55,000 employees worldwide are dedicated to fulfilling our corporate claim, "A Brand like a
